Lesson A

(Also available in Pyret)

Lesson A teaches the student how to fly a kite and jump into a lake while taking a selfie. Prerequisites are at least 10 hand-release pushups and a 220 pount trap bar deadlift.

Lesson Goals	Students will be able to: • Goal #1 • Goal #2
Student-Facing Goals	• I can... • I can... • I can...
Materials	• Lesson Slides • Lesson Slides • Page A 1 (student version!) (Page 1) • A link to a required online exercise (CPO - WeScheme - Desmos) (Wescheme) • A link to an optional online exercise (CPO, WeScheme, Desmos, etc (Wescheme) • *Optional: Exercise A 2, dont miss this* • *Optional: Exercise A 3* • *Optional: A link to an optional online exercise (CPO, WeScheme, Desmos) (Wescheme)*
Supplemental Resources	

Lesson Section Heading

10m

Overview

One sentence here, describing the section

Launch

Prose describing student task. About 3-4 sentences.

Notice and Wonder

Ask students to take a minute to see what they **notice**.

Discuss as a group.

Ask students to take a minute to see what they **wonder**.

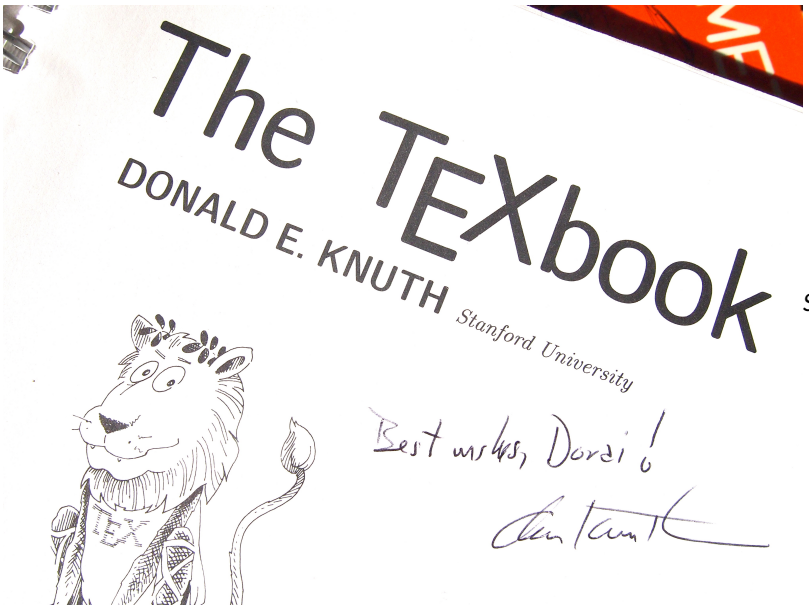
Use `lesson-point` to callout a short-but-important points.

```
(string-repeat)
(define s 3)
```

Investigate

3-4 sentences of prose describing task.

/// images are added with the following args: source, description, width, height, and source



Source: From Dorai's personal stash

[Page A 1 (student version!)]

[A link to a required online exercise (CPO - WeScheme - Desmos) (Wescheme)]

[Custom link text for an optional page, usually not in the workbook]

[A link to an optional online exercise (CPO, WeScheme, Desmos) (Wescheme)]

Use the `lesson-instruction` class for prose aimed directly at telling students what to do

Common Misconceptions

What are the most likely places kids will get stuck? Why? How do we help them?

Synthesize

- Guiding questions with responses here.
- And here.
- And here.
- etc.

Strategies for English Language Learners

MLR 8 — Discussion Supports: As students discuss the guiding questions, rephrase responses as questions and encourage precision in the words being used to reinforce the meanings behind some of the programming-specific language.

Additional Exercises

- Sample design recipe, etc
- A link to an optional online exercise (CPO, WeScheme, Desmos, etc (Wescheme)
