Radial Star

```
radial-star :: (
    points :: Number,
    inner-radius :: Number,
    full-radius :: Number,
    style :: String,
    color :: String
) -> Image
```

Using the detailed contract above, match each image to the expression that describes it.

Image			Expression
	1 -*D*	**A**	`(radial-star 5 50 200 "solid" "black")`
	2 -*A*	**B**	`(radial-star 7 100 200 "solid" "black")`
	**3** -*G*	**C**	`(radial-star 7 100 200 "outline" "black")`
	4 -*F*	**D**	`(radial-star 10 150 200 "solid" "black")`
	5 -*C*	**E**	`(radial-star 10 20 200 "solid" "black")`
	6 -*D*	**F**	`(radial-star 100 20 200 "outline" "black")`
	7 -*E*	**G**	`(radial-star 100 100 200 "outline" "black")`
