# Radial Star

```
radial-star :: (

    points :: Number,
    inner-radius :: Number,
    full-radius :: Number,
    style :: String,
    color :: String
) -> Image
```

Using the detailed contract above, match each image to the expression that describes it.

| Image | | | Expression |
|---|---|---|---|
| | 1 | A | `radial-star(5, 50, 200, "solid", "black")` |
| | 2 | B | `radial-star(7, 100, 200, "solid", "black")` |
|  | 3 | C | `radial-star(7, 100, 200, "outline", "black")` |
| | 4 | D | `radial-star(10, 150, 200, "solid", "black")` |
| | 5 | E | `radial-star(10, 20, 200, "solid", "black")` |
| | 6 | F | `radial-star(100, 20, 200, "outline", "black")` |
| | 7 | G | `radial-star(100, 100, 200, "outline", "black")` |
